Jordy Cates	“It’s a plant and that’s why I think it’s a medicine”: Indigenous Perspectives of Cannabis Use on Turtle Island.	9:45 – 9:52
Lisa Masini	Linking Inner Experience to Autonomic Nervous System Activity During Resting Baseline	9:55 – 10:02

Keynote Speaker

Dr. Kalee De France will deliver the keynote address, titled “Life trajectories: understanding the effects of poverty on development”.

Abstract: The effects of poverty are consistent: growing up in poverty leads to worse outcomes on many indices of well-being. However, we often look at single snapshots of development, failing to capture the ways that poverty can get under the skin and disrupt trajectories of human development. My talk will provide a brief overview of this trajectory approach to the effects of poverty. We will follow up with an introduction to my research on the role of emotions and emotion regulation in making sense of the effects of poverty, and some of the more promising prevention and intervention work in the field.

Poster Presentations

1	Decoding Deception: Exploring the Frequency and Sequencing of Smiles in Truthful and Deceptive Communication	Diana Gareth and Dr. Leanne ten Brinke
2	The Presence of Evidential Markers in English	Tina Reza, Dr. Elena Nicoladis, Tutku Tunali
3	Exploring Key Themes in ADHD-Related Content on TikTok	Alyssa Peppler and Dr. Malinda Desjarlais
4	The Willingness to Communicate in French	Anthony Polisi, Marie Elaine Lebel, Dr. Francis Langevin, Dr. Elena Nicoladis
